

Integration of HTRW into OE Work

HTRW Center of Expertise

18 December 2001

Overview

- Why Integration is needed
- How Integration is accomplished

Integration of HTRW into OE Addresses

- Regulators Concerns
- Stakeholders Questions

Project Management

- District Project Manager in charge of both OE and HTRW projects
 - Leads integration
 - Works within program and funding constraints

Mission is Site Closeout

- Our projects are not complete until both OE and HTRW are addressed

Accomplish Mission

- Upfront planning
- Good communication
- Realistic expectations

Technical Project Planning Tools

- Assemble multi-disciplinary teams
- Share existing site information
- Build Conceptual Site Models for both HTRW and OE at beginning of projects
 - Site physical features, site history
 - Source/Pathway/Receptor

Data Needed

- Data needs identified based on Conceptual Site Model
- Data collection options will evaluate what data can be obtained during OE investigation/removal work and what, if any, data is needed after removal action complete

Summary

- Avoid non-focused investigations chasing wild geese
- Chart clear path to site closeout
- Continue clear communication among all parties
